

## Enterprise-wide business intelligence

ProLink Solutions is a Denver-based firm specializing in custom software systems that meet your day-to-day needs.

ProLink's patent-pending framework allows us to efficiently develop custom systems based on your business needs at a fraction of the cost when compared to industry trends. What's more, ProLink easily integrates with your existing technology, enhances your workflow, and leverages existing documents and spreadsheets—all while improving staff efficiency, increasing revenue, and reducing training costs.

You receive a well supported, stable solution that best fits your business needs, without having to replace existing, well-oiled processes. Rather, ProLink builds on your existing processes and systems, replacing only those areas that need improvement, bringing visibility to all of your silos of information in one easy-to-use solution.

### What We Do:

- Create a business solution for you based on your users needs.
- Apply our patent-pending framework to quickly build your system.
- Leverage your organizations existing technology and user tools.
- Deliver full integration with Microsoft Word® and Excel® files, eliminating redundant data entry.
- Treat all clients and potential clients with integrity and respect.
- Maintain open-ended relationships with our clients through continued support and communication.

### Our Mission

ProLink's mission is simple: to apply our breakthrough technology to as many clients as possible, thus substantially increasing their productivity. We don't want clients to have to do more than they are already doing. Nor do we want to limit what they can do.
