

PROLINK ENTERPRISE SOLUTIONS

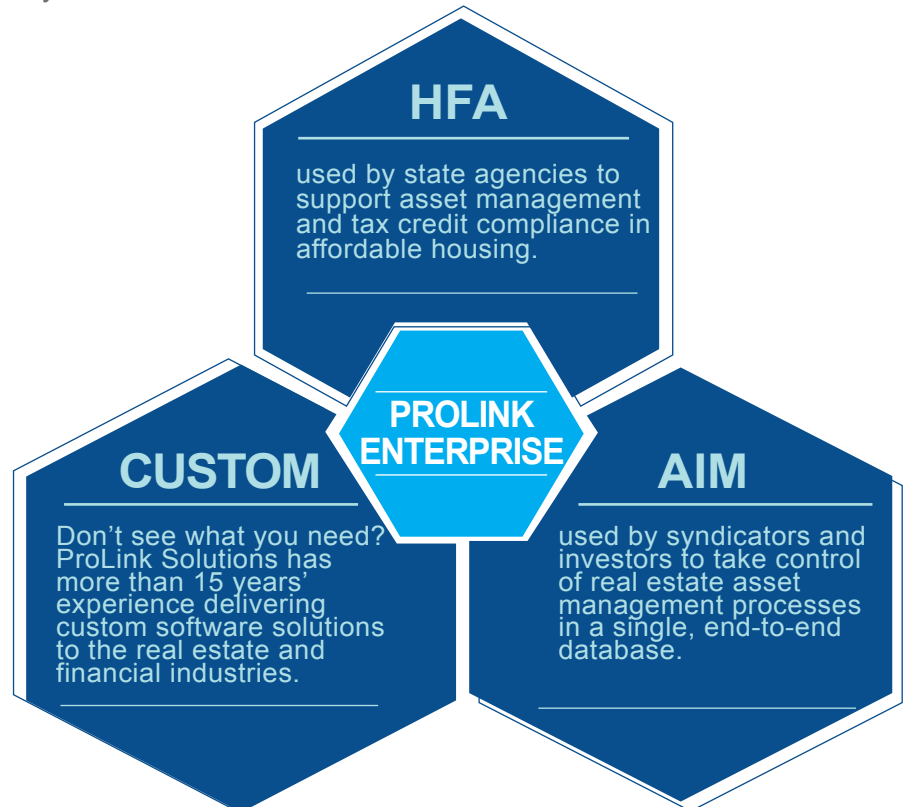

ProLink Solutions is a software company that enables the real estate finance industry to efficiently allocate capital, manage assets, and maintain compliance. We apply industry-leading technology and expertise to automate business processes and improve data accessibility.

“VHDA eliminated eight legacy systems, 22 manual processes, and facilitated intra-departmental data into one system. VHDA now has the data and transparency to report on its developments in an accurate and timely manner. ProLink provides peace of mind.”

- Virginia Housing Development Authority (VHDA)

WHO WE WORK WITH:

- Housing Finance Agencies
- Developers
- Syndicators
- Financial Institutions
- Property Managers
- Banks

ProLink HFA™

- Tax Credit Allocation
- Multi-Family Lending
- Construction Management
- Asset Management & Compliance
- Finance & Accounting
- Grants Management

Enterprise-grade software solution designed to support the heavy compliance and asset management requirements of state and governmental housing authorities. ProLink HFA allows agencies to identify their own specific data requirements, and use only the modules they need.

A web-based application, ProLink HFA, can be tailored to suit any authorities need. Because the data is securely stored on the cloud, it can be accessed anywhere at any time for on-site and real-time updates to the database. Ensure your team has access to the most accurate and current information for the best decision making possible.

ProLink AIM

- Origination
- Pipeline Management
- Acquisitions
- Underwriting
- Construction Management
- Asset & Compliance Management
- Syndication
- Risk Management
- Investor Reporting
- SOX Compliant

With ProLink Alternative Investment Management (AIM) software, all industrial, commercial, multifamily and mixed use asset management activities become streamlined in a single database.

ProLink AIM offers complete Microsoft Excel and Word integration that seamlessly transfers data back and forth between your existing templates and the ProLink database.

Easily access instant fund performance, manage lease agreements, automate financial reporting and develop relationship structures for the associated partnerships across all investments.
